Mobile: +91 82336 98162

Skills

- Languages: Python, C, CPP, Java
- Core Concepts: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks
- Libraries: Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn
- Tools/Platforms: Git, GitHub, MySQL, VS Code, IntelliJ IDEA, Jupyter Notebook, Excel, Power BI
- Soft Skills: Problem-Solving, Time Management, Quick Learning

Projects

Loan Eligibility Predictive System: September 2025 – November 2025

- Designed a machine learning model to predict loan approval using applicant financial and demographic data.
- Performed data cleaning, handled missing values, conducted EDA, encoded categorical features, and trained models like Logistic Regression and Decision Tree.
- Delivered ~80–90% prediction accuracy, reduced manual screening time by ~50%, and highlighted major factors influencing approvals.
  Tech: Python, Pandas, NumPy, Scikit-learn, Matplotlib/Seaborn, Logistic Regression, Decision Tree.

Hospital Management System: June 2025 – July 2025

- Built to efficiently automate key hospital operations like patient management, appointments, and billing.
- Developed a 25+ function system covering patient records, doctor management, scheduling, billing, and secure login using Java and OOP.
- Achieved ~40% faster data retrieval, reduced manual entry effort by ~60%, and improved record accuracy through centralized and automated workflows.
  Tech: Java, OOP, Collections Framework (HashMap, ArrayList), File Handling/JSON

COVID-19 Data Analysis: March 2025 – May 2025

- Created an analytical model to study COVID-19 trends using case counts, recoveries, deaths, and demographic factors.
- Cleaned datasets, handled missing values, performed EDA, and visualized patterns across regions and time.
- Identified key hotspots and trends, delivering clearer insights through charts and statistical summaries.
  Tech: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn (optional), CSV Data Handling.

Summer Training

Data Structure and Algorithm Training – ByteXL June 2025 – July 2025

- Implemented core data structures such as arrays, linked lists, stacks, queues, trees, and graphs using Java with practical, hands-on coding exercises.
- Solved diverse problems using prefix sum, hashing, recursion, dynamic programming, and greedy methods.
- Improved problem-solving efficiency by writing optimized, Java code and analyzing time and space complexity.

Certification

- Deep Learning – NPTEL Online Certification (IIT Kharagpur) May 2025
- Java Programming – NeoColab May 2025

Achievements

- Contributed to 5+ open-source repositories on GitHub with over 50 commits. November 2025
- Solved 200+ Data Structures and Algorithms on LeetCode November 2025

Education

- Lovely Professional University — Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering ***CGPA: 7.81*** — *August 2023 - Present*
- Hans International Sr. Sec. School — Jaipur, Rajasthan
  Intermediate ***Percentage: 77%*** — *March 2022 – March 2023*
- Hans International Sr. Sec. School — Jaipur, Rajasthan
  Matriculation ***Percentage: 65%*** — *March 2020 – March 2021*
